R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
library(sjPlot)
```

```
## Warning: package 'sjPlot' was built under R version 4.0.5
```

```
library(knitr)
library(kableExtra)
```

```
## Warning: package 'kableExtra' was built under R version 4.0.5
```

```
summary(cars)
```

Including Plots

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
